

# Page not found (404)

**Request Method:** GET

**Request URL:** http://127.0.0.1:8000/charge/2

Using the URLconf defined in `pdf_convert.urls`, Django tried these URL patterns, in this order:

1. `admin/`
2. `pdf/` [`name='pdf'`]
3. `index/` [`name='index'`]
4. `home/` [`name='home'`]
5. `download` [`name='download'`]
6. `student` [`name='student'`]
7. `student/<int:id>` [`name='detail'`]
8. `insurance` [`name='insurance'`]
9. `^media/(?P<path>.*)$`
10. `^static/(?P<path>.*)$`

The current path, `charge/2`, didn't match any of these.

You're seeing this error because you have `DEBUG = True` in your Django settings file. Change that to `False`, and Django will display a standard 404 page.
